

LAB Practice Assignment:

CrewAI Assignment

Problem Statement:

You are tasked with building a two-agent AI system using CrewAI to evaluate a hypothetical startup idea and generate a corresponding elevator pitch and pitch deck outline. The startup idea focuses on:

Example:

"An AI-powered platform that personalizes mental health support based on daily mood tracking and biometric inputs (e.g., smartwatch data)."

The two agents will simulate roles in a startup ecosystem:

A **Startup Analyst** to evaluate the feasibility and uniqueness of the idea.

A **Startup Consultant** to craft the investor pitch based on the analyst's report
